

ORBIT TITO

Ticket In - Ticket Out System

ORBIT TITO Overview

TITO technology enables patrons to collect credits from gaming machines via barcoded tickets which can be redeemed at gaming machines, cashiers, and cash redemption terminals.

The ORBIT TITO System provides a secure and easy-to-use web-based back-office and cashier interface which can be managed from any web browser, without the need of installing additional proprietary software.

The ORBIT TITO back-office interface allows operators to customise options based on user permissions.

User Interface features include:

- Live TITO Dashboard & Logs
- Cashier Issue & Redeem
- Pre-set & Custom Reports
- EGM, Cashier & CRT Config
- Secure Backups
- Live CRT Information
- Ticket Inquiry
- Ticket Clearance
- Users & Permissions

Built to GSA standards and recommended by GLI, the ORBIT TITO System is robust and is the perfect choice for any gaming venue.
